
COMPREHENSIVE TEST CASES

QA AUTOMATION & MANUAL VERIFICATION SPECIFICATION

SYSTEM UNDER TEST: TM-PMS Web Application (<https://tmpms.disctesting.in/>)

CLIENT MOCK: Intern Client Suite QA Automation

PREPARED BY: Rachit Borkar (QA Engineer)

DATE OF SPECIFICATION: May 27, 2026

QUALITY STANDARD: Standard QA Page Object Model Architecture (POM)

1. Core Module Automated Test Cases

TC-01 – Verify Login with Valid Credentials [Automated]

Pre-condition: Browser is open, internet is available.

#	Action / Step	Expected System Behavior
1	Open application login page: `https://tmpms.disctesting.in/login`	Login page loads completely with credentials fields.
2	Enter username: `Prakasht@gmail.com` and password: `1234`	Input text is successfully entered.
3	Click LOGIN submit button	Credentials are submitted successfully.
4	Observe URL redirection	User is redirected to Dashboard and `/login` is removed from URL.

TC-02 – Verify Client Creation with Unique Attributes [Automated]

Pre-condition: User is authenticated and on the Client Management page.

#	Action / Step	Expected System Behavior
1	Click '+ Add New Client' button	Creation form slider opens successfully.
2	Fill Client Name, contact person, emails, pan, valid 15-char GSTIN, PAN	Fields accept values properly.
3	Select Country (India), State (Maharashtra), City (Mumbai)	Dropdown options filter dynamically and select options.
4	Enter ship-to address and pincode details in details card	Fields populated.
5	Click Create button to submit	Form submitted; client created; user redirected back to list.

TC-03 – Verify Sales Order Creation & Grid Validation [Automated]**Pre-condition:** User is logged in; at least one client exists.

#	Action / Step	Expected System Behavior
1	Click Order Management → Sales Orders → + Add New Order	Sales Order form opens with empty grid row by default.
2	Select Client, Branch, Project Type, and Project Manager	Header dropdowns successfully set values.
3	Fill Sales Order Number, Reference Number, Order Date, and Delivery Date	Fields accept inputs.
4	Select Category and Item inside the grid row (placeholder: Item)	Selecting item automatically triggers auto-population of read-only grid fields (MAT, Size).
5	Enter Quantity and Unit Rate, and select Select Tax dropdown	Tax GST (5%) selected; overall amount calculates.
6	Click Create button	Sales Order submitted; redirected to Sales Orders list.

TC-04 – Verify Job Work (Work Order) Outsourced Flow [Automated]**Pre-condition:** User is logged in; at least one Vendor and Branch exists.

#	Action / Step	Expected System Behavior
1	Click Job Works → Work Order → + Add New Work Order	Work Order form loads.
2	Select Branch, Tax, and enter Order Date and Remark	Fields accept inputs.
3	Select Vendor and select Item Code / Name in the pickers	Dependent vendor-item relationships populated via API.
4	Enter Outsource Quantity and Rate inside the item details grid	Grid fields set successfully.
5	Click Create button to submit	Work Order submitted; redirected to Work Orders list.
